

IPTECHVIEW CLOUD SURVEILLANCE

NEW TIMES DEMAND NEW SOLUTIONS

IPTECHVIEW's cloud IP video surveillance solution constitutes one of the best deals for today's security market. Businesses have a true need for better basic surveillance that is focused on remote accessibility, smart alerts and notifications, and provides business managers and owners with actionable intelligence.

IPTECHVIEW's Cloud Software MxLINQ works in conjunction with MOBOTIX cameras. These high quality, cyber-secure German designed and manufactured cameras not only provide unparalleled high-resolution videos, they are also very durable, often lasting a decade or more. We coupled these cameras with our U.S.-based Secure Cloud Platform and offer immediate access to cameras from phones, tablets, laptops, or desk computers.

All cameras are pre-configured and can be installed in 5-10 minutes once the Ethernet cable is ready. Resellers can have us drop ship cameras and they can come and install. In today's times of social distancing, since all camera setup is already done, end users may even choose to manage their own in-house install of the first few cameras. The camera box includes basic installation instruction. The customer simply enters the URL and access credentials the reseller sends and can see all the cameras purchased for their location as well as additional locations they may buy once they start using the system.

For example, an initial set up with just two cameras for **less than 1,000 USD in hardware** + starting at 10 USD month for Remote Access and Cloud Storage with 30-day retention and installation.

Get what's needed now, but easily expand your full pro-active surveillance solution to hundreds of cameras and locations.

PICK YOUR CAMERA(S)

MOBOTIX P26

Directional 180° degrees.
Indoor, ceiling-mounted
front-facing with audio.
Great situational awareness.

MOBOTIX C26

Hemispheric 360° degrees
with audio. Best all-around
situational awareness.

MOBOTIX i26

Wall mounted, front-facing
with audio. Best for seeing
things in the room from the front
and out to the street.

BENEFITS

Monitor all ingress and egress to locations with just **one** or **two** ceiling or wall-mounted **IPTECHVIEW** **MOBOTIX** cameras.

Full Situational Awareness - Check on your location at any time to see live video.

Optionally access your cameras over your VoIP phone system for two-way audio to hear what's happening and intervene over built-in speakers. Power speakers are available by **IPTECHVIEW** for **MOBOTIX** cameras.

Fully Scalable Surveillance Solution. Not a cheap throw away but one of the best systems available. Add more cameras to common areas to the warehouse or parking lot and grow into a full system as needed. (Great for nationwide multi-site deployments.)

People Counting. Know how many people came to the office at any time and have statistics by days, week, and month. This option is best set up by the reseller. Time and material charges may apply.

Superfast Install - Same-days shipment of our pre-configured ready-to-install - cameras.

Instant accessibility from anywhere. Super intuitive - Customers love the functionality set and ease of you.

No hassle. No servers needed. Just a POE connection to the router for a secure segregated Internet tunnel. Unique configurations and maintenance can optionally be done remotely customers and the integrator/technology partner.

AlarmReady™ - Instant integration with alarm system that has a siren near the camera. Instantly receive an email or SMS to see your location for owner based Video Verification. Be ready the next time your alarm goes off and know what to do. Save false alarm fees and have peace of mind. Optional wired connection is available if needed.

Have a video log of everyone who was there. Includes 30 days cloud recording of any activities in the camera field of view. (Can be extended to up to 365 days)

IPTECHVIEW is a 6-year-old US-based company with thousands of cameras all over the nation. Our cloud service runs on **AMAZON AWS** with the highest security standards and excellent 99,99% uptime history. All video is encrypted at all times. US-based software and Systems Support and installation and maintenance by your local partner.

Of all the systems on the market, **IPTECHVIEW** offers the best combination of German engineered surveillance hardware with powerful, yet simple to use, cloud-based software linking you to your cameras - anywhere at any time, in just seconds.

There is simply no other solution that provides users with more situational awareness, faster (instant) alerts, and a feeling of being in control. Try **IPTECHVIEW** on your next deployment.

Please note: Basic Cloud Storage is sufficient for most users of event-driven recording. High volume or continuous recording may require higher level. More info : http://www.abptech.com/cloud_storage_levels

IPTECHVIEW is only sold by registered and certified partners.
